

Pilot Business Plan Workshop Series

A group of 13 KU SBDC and Lancaster, York and Chester County SCORE staff worked 2,000 hours to develop a new Business Plan workshop series that debuted on March 8. This is our number one program that is geared toward startup and early stage businesses.

The team that developed the series has an average of 40 years experience in running businesses, so we anticipate good results from the restructuring and anticipate that it will become a best practice for our workshops in other counties.
